CVE-2026-134624

VULNERABILITY · CYBER DESK

Compiled by machine from news coverage; not reviewed analysis. A snapshot taken on 23 Nov 2026. Numbers in brackets point to the Sources list at the end. The live page: https://morningstarsecurity.com/wiki/cve-2026-134624

FACTS

- **CVSS:** 9.3 (low confidence, 1 independent source) [2]
- **Weakness:** CWE-918: Server-Side Request Forgery (low confidence, 1 independent source) [2]
- **Disclosed:** 2026-11-23 (low confidence, 1 independent source) [2]
- **Patch status:** patch-available (low confidence, 1 independent source) [2]

AFFECTED PRODUCT

- Mail Assure
- SpamExperts Hosted Cloud

ENTRY

CVE-2026-134624 is a vulnerability mentioned in the news MorningStar covers.

Drawn from 1 news source; the facts and relationships below show where each detail comes from.

OFTEN MENTIONED TOGETHER

Entries that turn up in the same stories. This is not a stated relationship. Mail Assure

ABOUT MORNINGSTAR SECURITY

MorningStar Security is a security news reader and community, started in 2009 and relaunched in 2026. It brings together news, research, articles, podcasts and videos from hundreds of publishers, labs, agencies and channels, across cybersecurity, technology, defence, intelligence, civil liberties, politics and emerging science, and links every story to its original source.

Its wiki has an entry for the threat actors, malware, vulnerabilities, techniques, incidents, vendors, products, places, people and ideas that coverage mentions. Each entry is compiled by machine from the stories the site indexes. Every fact is tied to the story it came from, and its confidence is capped by how many independent publishers report it: aggregators do not count, and two feeds from one publisher count

once. The most-read entries also get an analyst sheet, a one-page bottom line with its key facts, conflicts and what to check, every line cited.

Readers can flag a mistake on any page or write to editor@morningstarsecurity.com.
